Investment Approach

IMPRESS
PORTFOLIO

Objective

Focus on Return Optimization by investing in multicap portfolio of rising enterprises with sound corporate track record and sustainable business model keeping balance between value and growth strategy.

Value investing is the art of buying stocks which trade at a significant discount to their intrinsic value. Portfolio Manager achieve this by looking for companies on cheap valuation metrics, typically low multiples of their profits or assets, for reasons which are not justified over the longer term.

Value

Growth investing is a style of investment strategy focused on capital appreciation. Portfolio Manager invest in companies that exhibit signs of above-average growth, even if the share price appears expensive in terms of metrics such as price-to-earnings or price-to-book ratios.

Growth

Why Multicap Strategy

	Bull Period		
	Apr-03	Dec-07	CAGR
Sensex	2960	20287	51.0%
BSE Mid Cap	952	9789	64.6%
BSE Small Cap	893	13348	78.4%

	Bear Period		
	Dec-07	Dec-11	CAGR
Sensex	20287	15455	-6.6%
BSE Mid Cap	9789	5135	-14.9%
BSE Small Cap	13348	5550	-19.7%

	Current Bull period		
	Dec-11	Mar-26	CAGR
Sensex	15455	71948	11.4%
BSE Mid Cap	5135	41604	15.8%
BSE Small Cap	5550	44430	15.7%

- The table shows outperformance of the Mid Cap and Small Cap Index over the Sensex Index during the Bull Period.
- Outperformance of the Mid Cap and small caps happens because of better earnings growth in the bull phase.
- The P/E for Mid cap and Small Caps also expands as earnings growth is superior v/s Sensex earnings growth.
- Identifying the business within attractive valuation compare to their growth is key factor for outperformance.
- Returns delivered from Mid Cap and Small Cap do outperform the Large Cap, however one should keep in mind the risk associated with it as we see the higher volatility in it. Therefore we emphasis on stringent stock selection strategy and create a diversified Multicap portfolio to create alpha over the benchmark.

- Cyclical / Non Cyclical
- Favoring Policies

Diversification

- Sectorally well diversified portfolio of 15-20 stocks across Market Capitalization

Exposure

- Single Stock exposure < 10%
- Single Sector exposure < 30%

V

Valuation Check

A constant check is kept on the valuation of the companies so that any stock whose valuation becomes relatively high, due to any reasons like sentiments or increase in liquidity, is exited before any price correction comes to the stock. We then shift the money to a new stock with a reasonable valuation.

I

Impact of Events

A stock price can be highly affected by an event or series of events, recent examples: COVID crisis, Russia-Ukraine War, Increase in Crude Price, Interest Rates Hike etc. Our team actively tracks these events and makes timely modifications as per the situation's needs to minimize risks & optimize returns.

E

Earnings Visibility Changes

Our fundamental research team scrutinizes the quarterly results of the companies to understand the current & future estimated growth. If we are not satisfied with 2 or 3 quarterly results of the company & don't see growth, we take an exit to move to another stock.

W

Weightage Check of the Holdings

Every stock & sector has been capped to a certain percentage of the total allocation to limit downside due to any uncertainties and also diversify the portfolio. If any stock or sector reaches near to the decided percent of allocation, we book profits and reduce the weightage and invest into any other stock.

Top Holdings & Market Cap Allocation

Sr No	Top 10 Holdings	% Holdings
1	Cemindia Projects Limited	9.2%

Portfolio Performance

The table shows absolute portfolio returns (%) for investments made at the start of a given year and held until the end of each subsequent year.

Investment made From the start of

Returns	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026
2017	11.0%									
2018	-7.4%	-16.6%								
2019	-18.3%	-26.4%	-11.8%							
2020	15.0%	3.6%	24.1%	40.7%						
2021	82.9%	64.8%	97.5%	123.9%	59.1%					
2022	79.3%	61.5%	93.6%	119.5%	56.0%	-2.0%				
2023	139.9%	116.1%	159.1%	193.7%	108.7%	31.2%	33.8%			
2024	237.0%	203.6%	263.9%	312.5%	193.1%	84.2%	87.9%	40.5%		
2025	203.9%	173.8%	228.2%	272.0%	164.4%	66.2%	69.5%	26.7%	-9.8%	
2026 YTD	223.1%	191.1%	249.0%	295.5%	181.1%	76.7%	80.2%	34.7%	-4.1%	6.3%

Till the end of

How to read this table:

- **Columns** represent the year in which an investor *started investing*.
- **Rows** represent the year up to which the investment is *held*.
- Each cell shows the **absolute return (%)** earned by an investor who invested at the **start of the column year** and stayed invested **until the end of the row year**.
- **Green cells** indicate positive returns, while **red cells** indicate periods of drawdown.

Note: - The Returns mentioned above are absolute returns. Returns net of fees and expenses.

Disclaimer: Past Performance is not necessarily indicative of likely future performance. Performance mentioned above are not verified by SEBI. We have shown the performance as Aggregate performance of all clients on TWRR basis.

Ratios (5 Years Data)

Particulars	BETA	Standard Deviation	Sharpe Ratio	Treynor Ratio	Jenson Alpha	Avg. Portfolio Turnover
IMPRESS PMS	1.13	21	0.91	16.85	4.7	35.9%
BSE 500 TRI	1	14.5	0.88	12.7	NA	NA

Beta: It measures how much an investment moves compared to the overall market. Beta of 1 means it moves with the market, less than 1 means less risk and greater than 1 means more risk.

Standard Deviation: Shows how much the returns of an investment can go up or down. High ratio means the returns can be very different from the average, making it riskier, while a low standard deviation means the returns are more stable and predictable.

Sharpe Ratio: It tells us how much return we get for the risk we take with an investment. A higher Sharpe ratio means better returns for each unit of risk, making it a good measure of how well an investment compensates for its risk.

Portfolio Turnover: Also called as churn ratio, is used to reflect the frequency of transactions done in the portfolio. High turnover means high frequency of trading, while low turnover means the investments are mostly held for longer periods.

Treynor: It shows how much return an investment gives for the risk taken from market movements. A higher Treynor ratio means better performance for the given risk.

Jenson Alpha: It is used to determine if a portfolio is earning proper returns for the level of its risk. Positive value means that the fund manager is outperforming the market with their stock-picking skills.

Success Stories – Radico Khaitan

Radico Khaitan Limited (RKL) is one of the oldest and the largest manufacturers of Indian Made Foreign Liquor (IMFL) in India.

RKL is one of the few companies in India to have developed its entire brand portfolio organically, with in-house capabilities.

With over 15 brands including four millionaire brands in its portfolio – 8PM Whisky, Magic Moments Vodka, Contessa XXX Rum and Old Admiral Brandy - the rich history of over 75 years continues to set the pace for today and shape the business outlook for tomorrow.

Through premium brand launches, backward integration, better pricing and wider distribution, Radico Khaitan is in a sweet spot.

Radico Khaitan

Success Stories – KEI Industries

KEI Industries is a leading manufacturer of electrical wires & cables.

Energy transition (solar and wind), expansion in transmission and distribution networks, and healthy activity across data centers, real estate, and broader infrastructure segments are supportive for the growth.

Bajaj Finance

- One of the Fastest growing and well diversified NBFC from the Bajaj Group.
- Consistent growth in NII and ROA with NPA under control.
- Focus on retail franchise.
- Always got better valuation than peers.
- Exited full investment as credit growth is likely to be slower and with base reaching so high for NBFC and Capital raising to dilute earning. Which will pull down the premium valuation it command due to high growth.
