Investment Approach

**MNC**  
**PORTFOLIO**

## Objective

Focus on consistency of return and risk moderation by investing in Multinational Companies listed in India.

Investments into listed companies in India in which the foreign shareholding is over 50% and/or the management control is bestowed in foreign company and/or the technological and managerial know-how brought in by foreign partner/investor.

Companies to undergo 4 P Analysis to make it to the Universe

- MNC's benefit from the economy of scales by spreading R&D expenditures and advertising costs over their global sales, pooling global purchasing power over suppliers, and utilizing their technological and managerial know-how globally with minimal additional costs.
- MNC's can use their global presence to take advantage of underpriced labor services available in certain developing countries, and gain access to special R&D capabilities residing in advanced foreign countries

- MNC's are generally rated high for their corporate governance standard.
- MNC's depict high transparency and accountability with well laid out policies and regulatory framework, internal control and risk management.
- This provide good comfort for an investor who would not fall prey to any negative impact on investment due to corporate mis-management and fraud.

## High Operating Ratio

Most MNC's have better operating ratios compared to its peers, Operating margins would vary depending upon the sector it operates in.

## Zero Debt or Low Debt Equity

Most MNC's are zero debt company or Very low on Debt Equity hence. Changes in Interest rate cycle do not affect these companies.

## Positive Free Cash Flow

Operating free cash flow is positive in most of them, they are cash rich and regular dividend paying company.

## Healthy Return Ratio

Return ratio like ROE and ROCE are also high compare to peer group in most cases. Investors benefit from share premium the share price command on sustain basis.

MNC companies during the holding period provides healthy dividend and capital appreciation by earnings growth and sometime carries an additional trigger for value appreciation in form of corporate actions like Open offers, Buybacks and Delisting etc. This usually add substantial appreciation to the share price enhancing investors ROI. Below are some illustrations of the same.

| Sr. | Company        | Corporate Action | Announcement date | Price before Announcement | Date      | Price on closure of offer | % Gain |
|-----|----------------|------------------|-------------------|---------------------------|-----------|---------------------------|--------|
| 1   | Fulford India  | Delisting        | 25-Apr-14         | 682                       | 30-Jul-15 | 2400                      | 252%   |
| 2   | Alfa Laval     | Delisting        | 16-Sep-11         | 1965                      | 12-Apr-12 | 4000                      | 104%   |
| 3   | HUL            | Open Offer       | 29-Apr-13         | 497.6                     | 04-Jul-13 | 600                       | 21%    |
| 4   | Glaxo Consumer | Open Offer       | 23-Nov-12         | 3049                      | 30-Jan-14 | 3900                      | 28%    |
| 5   | Siemens        | Open Offer       | 28-Jan-11         | 727                       | 13-Apr-11 | 930                       | 28%    |

# NIFTY MNC Index Analysis/Study

A study done on Nifty MNC Index which constitute 15 stocks shows favorable risk reward a portfolio of MNC company could deliver.

## Annualised Return as on 31st Dec, 2024

■ NIFTY MNC INDEX ■ NIFTY 50 INDEX

| From 2004 to 2024                  | NIFTY MNC Index | NIFTY 50 Index |
|------------------------------------|-----------------|----------------|
| Annualised Return                  | 14.91%          | 12.92%         |
| Average 3 Year Rolling Return p.a. | 13.21%          | 11.49%         |
| Annual Volatility                  | 19.20%          | 20.99%         |
| Beta with NIFTY 50                 | 0.8             |                |
| Correlation with NIFTY 50          | 0.9             |                |

- NIFTY MNC Index has good correlation with NIFTY 50 Index. However the Beta stands at 0.8
- Annualized returns of NIFTY MNC Index is higher compared to NIFTY 50 Index and Volatility is lower.
- This shows a favorable risk reward for NIFTY MNC against NIFTY 50 Index

Note: The above study is done on Nifty MNC Index which constitute 15 stocks. The actual portfolio in PMS could deviate compared to NIFTY MNC Index. The above analysis is not an indicative of future performance.

# Portfolio Strategy

Portfolio Positioning  
Medium Risk & Reward

Multi-cap Style of investment, Fund manager may change the allocation according to market condition.

Allocation

V

## Valuation Check

A constant check is kept on the valuation of the companies so that any stock whose valuation becomes relatively high, due to any reasons like sentiments or increase in liquidity, is exited before any price correction comes to the stock. We then shift the money to a new stock with a reasonable valuation.

I

## Impact of Events

A stock price can be highly affected by an event or series of events, recent examples: COVID crisis, Russia-Ukraine War, Increase in Crude Price, Interest Rates Hike etc. Our team actively tracks these events and makes timely modifications as per the situation's needs to minimize risks & optimize returns.

E

## Earnings Visibility Changes

Our fundamental research team scrutinizes the quarterly results of the companies to understand the current & future estimated growth. If we are not satisfied with 2 or 3 quarterly results of the company & don't see growth, we take an exit to move to another stock.

W

## Weightage Check of the Holdings

Every stock & sector has been capped to a certain percentage of the total allocation to limit downside due to any uncertainties and also diversify the portfolio. If any stock or sector reaches near to the decided percent of allocation, we book profits and reduce the weightage and invest into any other stock.

# Top Holdings and Allocation

| Sr. No. | Top 10 Holdings                            | % Holdings |
|---------|--------------------------------------------|------------|
| 1       | Nippon Life India Asset Management Limited | 7.76%      |
| 2       | Cummins India Ltd                          | 7.76%      |
| 3       | Maruti Suzuki India Limited                | 6.59%      |
| 4       | Siemens Energy India Limited               | 6.47%      |
| 5       | Glaxosmithkline Pharma Ltd                 | 5.89%      |
| 6       | Cemindia Projects Limited                  | 5.43%      |
| 7       | CRISIL Ltd                                 | 5.41%      |
| 8       | Nestle India Ltd                           | 4.99%      |

Data as on 31<sup>st</sup> July, 2026

| Ratios (5 Years Data) |      |                |              |         |              |                    |
|-----------------------|------|----------------|--------------|---------|--------------|--------------------|
| Particulars           | BETA | Std. Deviation | Sharpe Ratio | Treynor | Jenson Alpha | Portfolio Turnover |
| MNC PMS               | 0.9  | 15.3           | 0.9          | 14.9    | 1.9          | 28.4%              |
| BSE 500 TRI           | 1    | 14.5           | 0.9          | 12.8    | NA           | NA                 |

**Beta:**

It measures how much an investment moves compared to the overall market. Beta of 1 means it moves with the market, less than 1 means less risk and greater than 1 means more risk.

**Standard Deviation:**

Shows how much the returns of an investment can go up or down. High ratio means the returns can be very different from the average, making it riskier, while a low standard deviation means the returns are more stable and predictable.

**Sharpe Ratio:**

It tells us how much return we get for the risk we take with an investment. A higher Sharpe ratio means better returns for each unit of risk, making it a good measure of how well an investment compensates for its risk.

**Portfolio Turnover:**

Also called as churn ratio, is used to reflect the frequency of transactions done in the portfolio. High turnover means high frequency of trading, while low turnover means the investments are mostly held for longer periods.

**Treynor:**

It shows how much return an investment gives for the risk taken from market movements. A higher Treynor ratio means better performance for the given risk.

**Jenson Alpha:**

It is used to determine if a portfolio is earning proper returns for the level of its risk. Positive value means that the fund manager is outperforming the market with their stock-picking skills.

# 4 Years Past Performance

Data as on 31<sup>st</sup> July, 2026

The above graph represents how our MNC PMS offering has over-performed compared to 2 indices, namely: Nifty 50 & Nifty MNC. The comparison is of past 4 years where the returns of our PMS are post expenses.

# Portfolio Performance

Performance as on 31st July, 2026

■ MNC ■ Nifty MNC Index

**Note:** - Returns above one year are annualized. Returns are net of all fees and expenses.

**Disclaimer:** Past Performance is not necessarily indicative of likely future performance.

Performance mentioned above are not verified by SEBI. We have shown the performance as Aggregate performance of all clients on TWRR basis.

# PORTFOLIO STRATEGY

Out of 4500 listed Company, there are only 90 odd MNC Companies which are own by Foreign Promoter with more than 2000 cr Market Cap which make the stock universe limited for further evaluation.

# Well Balanced Defensive but Growth

The three bucket strategy with shifting allocation as per the market outlook help to further optimize the returns, However Consumables remains the core part of the portfolio.

# Growth like Multicap but Quality like Large Cap

- MNC PMS is a Multicap Portfolio with all market capitalization. (large, Mid, Small)
- There are many companies which by Indian Market Cap Definition are called as Midcap Companies where as by Global Definition these are Large cap.
- One gets benefit of growth like Midcap Companies in India where as Quality of Large Cap. Few Eg given below

|            |                                                                                                                           |
|------------|---------------------------------------------------------------------------------------------------------------------------|
| Pfizer     | <ul style="list-style-type: none"><li>• Midcap in India</li><li>• Biggest Pharma Company in World</li></ul>               |
| 3 M India  | <ul style="list-style-type: none"><li>• Midcap in India</li><li>• Part of Dowjones 30 index</li></ul>                     |
| Bata India | <ul style="list-style-type: none"><li>• Midcap in India</li><li>• 125-year-old Company operates in 70 Countries</li></ul> |
|            |                                                                                                                           |
|            |                                                                                                                           |
